

Environmental education

Environmental education

In order to enhance the employees' awareness and understanding on environmental policies and the management system, Daido Steel promotes plant-wide environmental education for every class of employee according to their levels. Daido Steel enlightens employees by organizing environmental-related events, inviting a lecturer from outside the company and hosting a lecture by environmental specialists.

Lecture on environmental issues(Shibukawa plant)

Promotion for Acquirement of Environmental-related Qualifications

Daido Steel introduces a personal management system that gives favorable treatment to the employees who acquire the environmental-related qualifications in order to promote and improve the environmental management activities. Furthermore, we have promoted the qualification acquirement of internal auditor as well by inviting a lecturer from outside educational institution. Also, Daido Steel has held study session with affiliates/subsidiaries.
