

Safety and Health

Safety

Safety policy of Daido Steel is; "Safety is the basis of management and it is the priority of all."

Management and workers are involved in activities for safety. The result of 2002 was the best of our history thanks to the activities for safety.

Award winning at 43rd Safety Commendation by Japan Iron and Steel Federation

----------------	-----------------------------

Mr. Takayama, President of Daido Steel presented safety activities of Daido Steel at Safety Conference.

Ratio of incident with leave

- 1 The Japan Iron and Steel Federation acknowledges 88 plants/offices. 6 plants/offices are entry for this statistics.
- 2 Formula: ratio of incident with leave = $\frac{\text{Number of Person of incident with leave}}{\text{1 million labor hours}}$

Health

A health management system has been established under good communication between Daido Hospital, which is our subsidiary hospital and our health insurance association. Each section has its THP (Total Health Promotion) leader, and they support the promotion of health management. Also, a special program called "Healthy Japan, 21st century plan at Daido Steel" has started this year. All employees joined this activity and take care of themselves to be more healthy.

*THP leader

To be a THP leader, they have to take original 2-day training course. There are 215 leaders as of March, 2003.
