

Thank you for reading through this report.

This environmental report has been issued since FY2000. All the data was disclosed in absolute values and can be compared to that of last fiscal year. Daido Steel will continue to make even greater efforts to contribute to the establishment of the recycling-oriented society and to improve its environmental performance. Please give us your honest opinions and impressions on the environmental report.

Message of Cover design

- The bird on the front page is a kingfisher - a beautiful and precious bird seldom seen even by the keenest birdwatcher. The kingfisher requires a pristine water source. It symbolizes our motivation to maintain the environment so that this bird can be seen at any time.
