**Nano-granular TMR type magnetic sensors**

J series is the bare chip magnetic sensor in which the nano-granular TMR elements are arranged into full bridge circuit. It shows excellent performance in various applications.

### Features
- High output voltage
- High sensitivity
- Minute size
- Low power consumption
- Low temperature dependency
- Low hysteresis

### Outside dimension (mm)

<table>
<thead>
<tr>
<th>Model No.</th>
<th>J01, J02, J03, J04</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resistance (without field)</td>
<td>100 kΩ</td>
</tr>
<tr>
<td>Effective magnetic field, $H_k$</td>
<td>±4 kA/m (50 Oe)</td>
</tr>
</tbody>
</table>

### Structure
- Sensor: nano-granular TMR (Full bridge circuit)
- Substrate: Si
- Electrode: Au

### Applications
- Encoder
- Linear scale
- Current sensor
- Compass
- Bill acceptor, etc

### Electro-magnetic specification

</tbody>
</table>
Output voltage characteristic

- The vertical axis shows the differential output (V\text{out}1 - V\text{out}2) at the supply voltage (Vcc) of 5 V.
- The magnetic field was applied along the direction of the arrow.

Temperature characteristics (reference data)

※This catalogue was compiled in July 2013. All items listed in the catalogue are subject to change without any prior notice.

Products listed in this catalogue are manufactured for use in standard applications (eg: household appliances, OA/AV, Telecommunications, measurement instruments). Please do not use the products in critical reliability and security applications (eg: space and aviation, critical-safety transport applications, nuclear power control, medical, life-supporting units and equipment).
